Nikki Goel

Flutter

Multi-Platform Framework

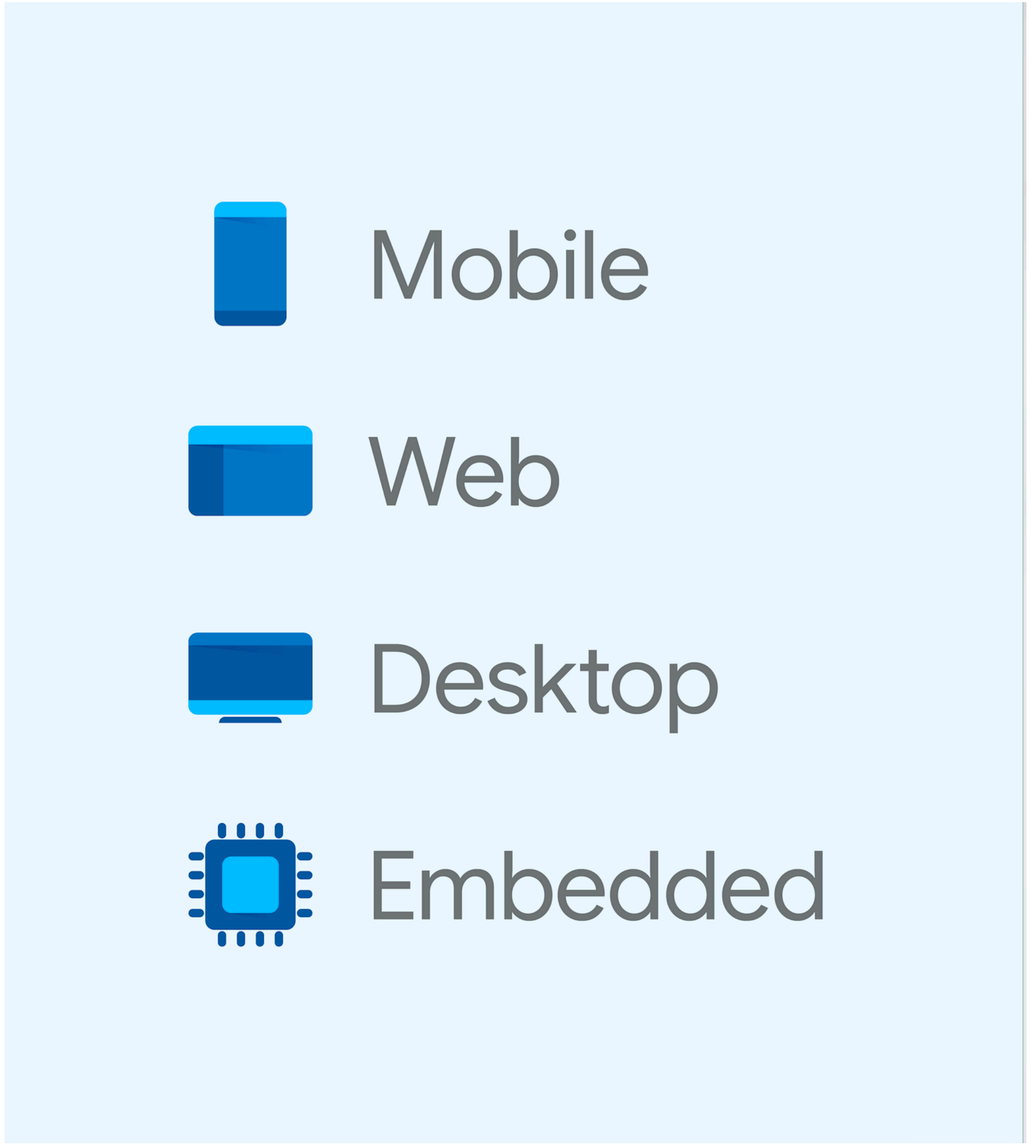
- Open-source, created by Google
- Powered by Dart programming language
- What is built using Flutter?
  - BMW vehicle companion app
  - Google Pay app
  - Google Classroom
  - PUBG Mobile

https://flutter.dev/

https://dart.dev/

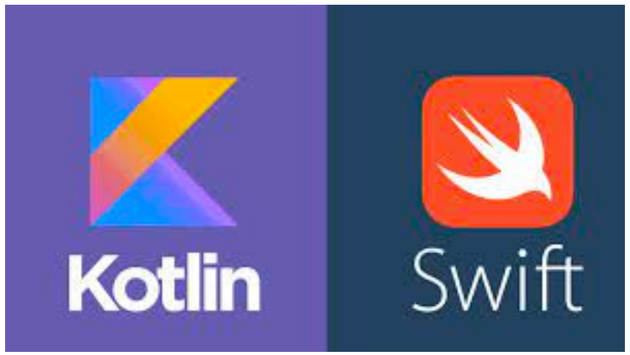
Why Flutter

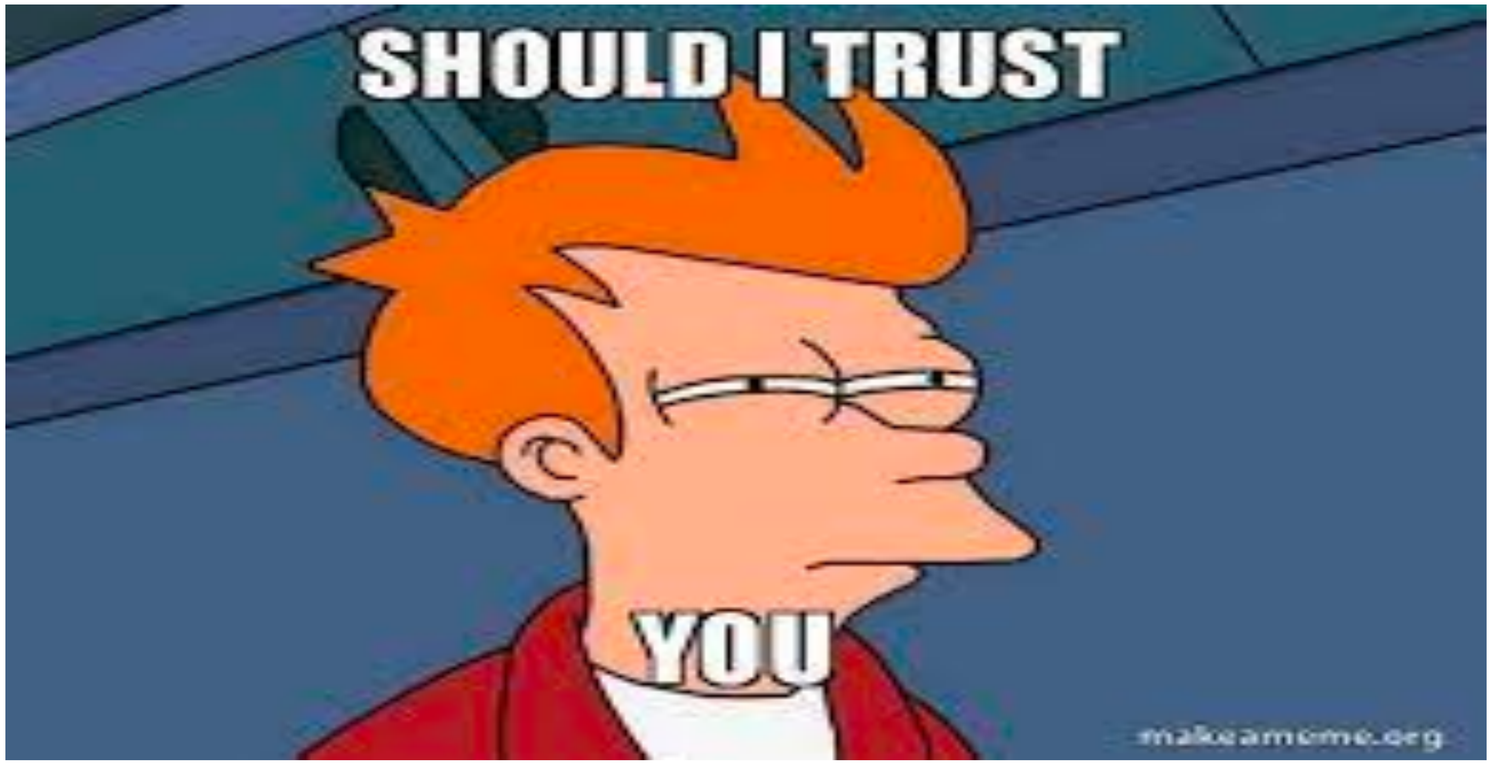
- Beginner friendly
  - Easy to setup
  - Dart is similar to JS, Java, C type syntax
  - Excellent documentation
- One codebase for all platforms
- Growing community
- UI Toolkit



Alternatives

For Mobile Apps



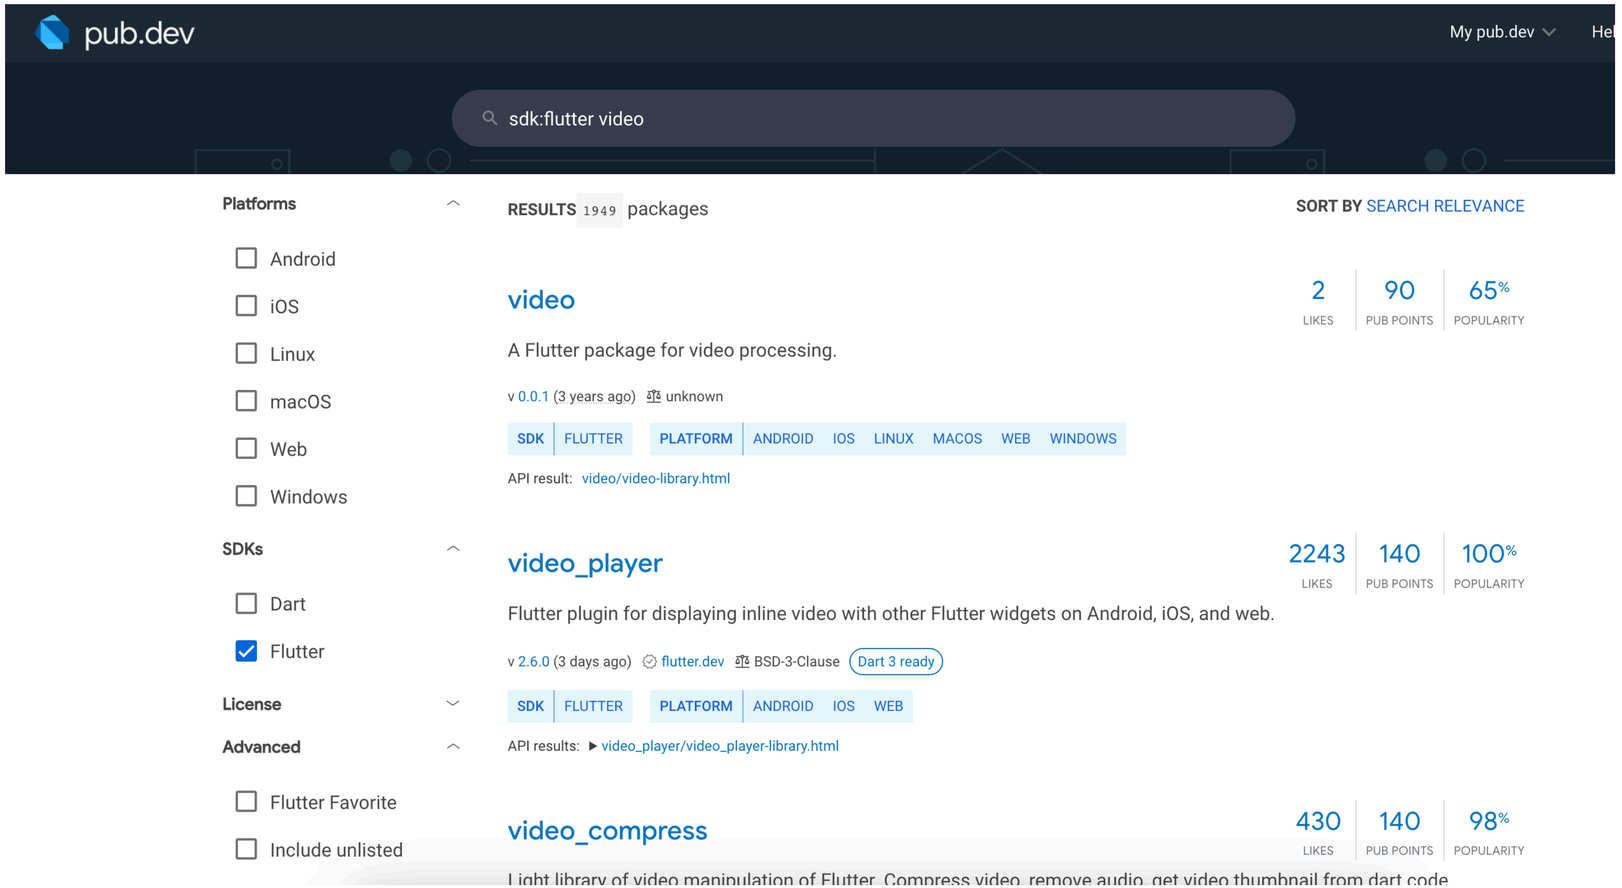


SHOULD I TRUST
YOU
makeamome.org

Why not Flutter

- Content heavy website
- Highly dependent on the native/hardware features like camera, bluetooth, audio, etc.
- Can get messy very quickly if not well structured.

to properly index. For web content that is static or document-like, we recommend using HTML—just like we do on flutter.dev, dart.dev, and pub.dev. You should also consider separating your primary application experience—created in Flutter—from your landing page, marketing content, and help content—created using search-engine optimized HTML.



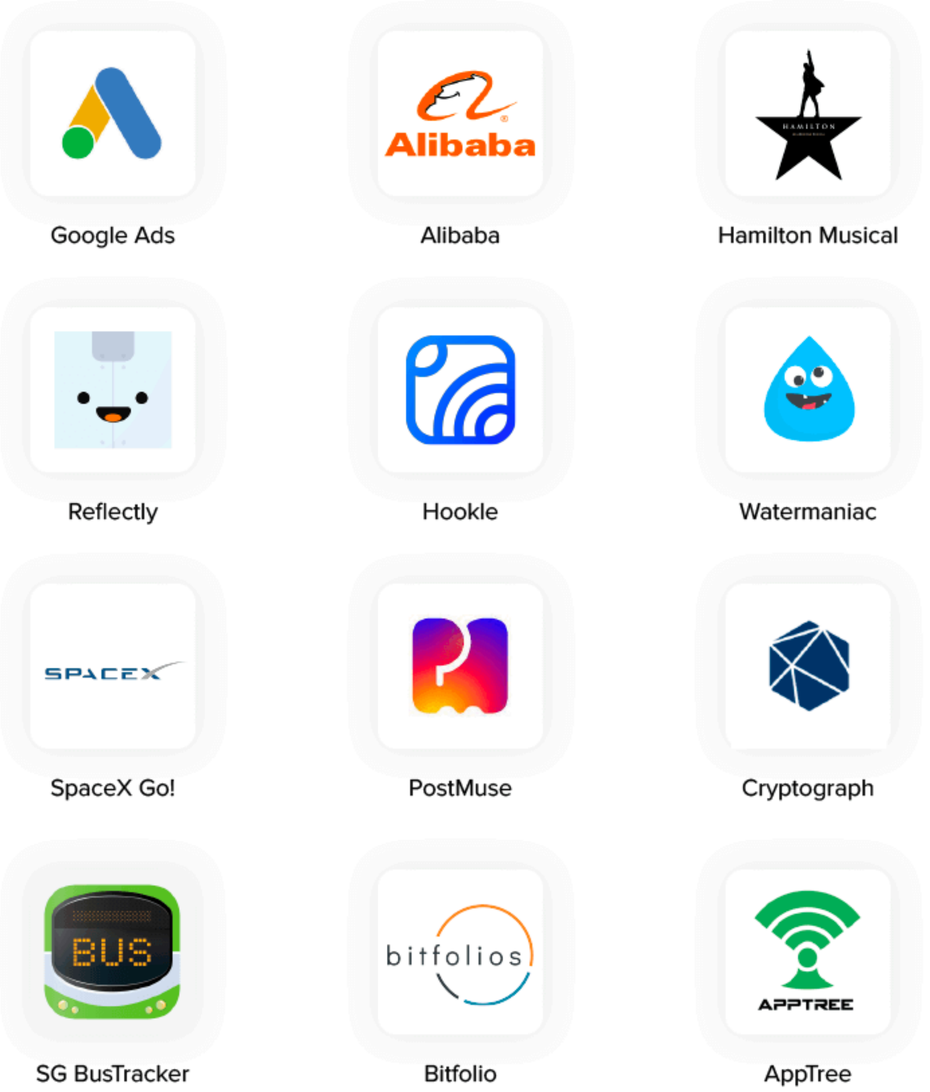
Live Coding

Let's get our hands dirty

SHOW ME THE
MONEY!!!!!!!!

Career in Flutter

- How I started?
- Get done with fundamentals
- Learn with everyone!
- Build project(s), contribute open source projects, build startups
- Never stop learning
- Search for companies
- Apply for interships



Flutter Community

Stay upto date

- Discord
- Conferences
- Newsletter
- YouTube
